6. Taking an active role on sanity-regression testing schedule, discussion, grooming, and sprint planning

7. Using management tools such as Jira to create tickets and create documentation on confluence

8. Pursue continuing education in new solutions, technologies, and skills

SUMMARY

Starting in 2021 I began with a career as a Quality Assurance Tester and have improved and gained myself into a Quality Assurance Engineer in the last 2 years. My background in computer engineering has provided me with a strong technical foundation, enabling me to understand the software design and development.

My expertise lies in both manual and automated testing, and proved by the various projects I included in. I also a highly motivated, leading by example, taking charge of a situation and coming up with excellent solutions. On every projects, my goal is to identify and resolve potential issues before they affect the end-user, ensuring a seamless and positive user experience.
